

How to Print Your Scanned Images

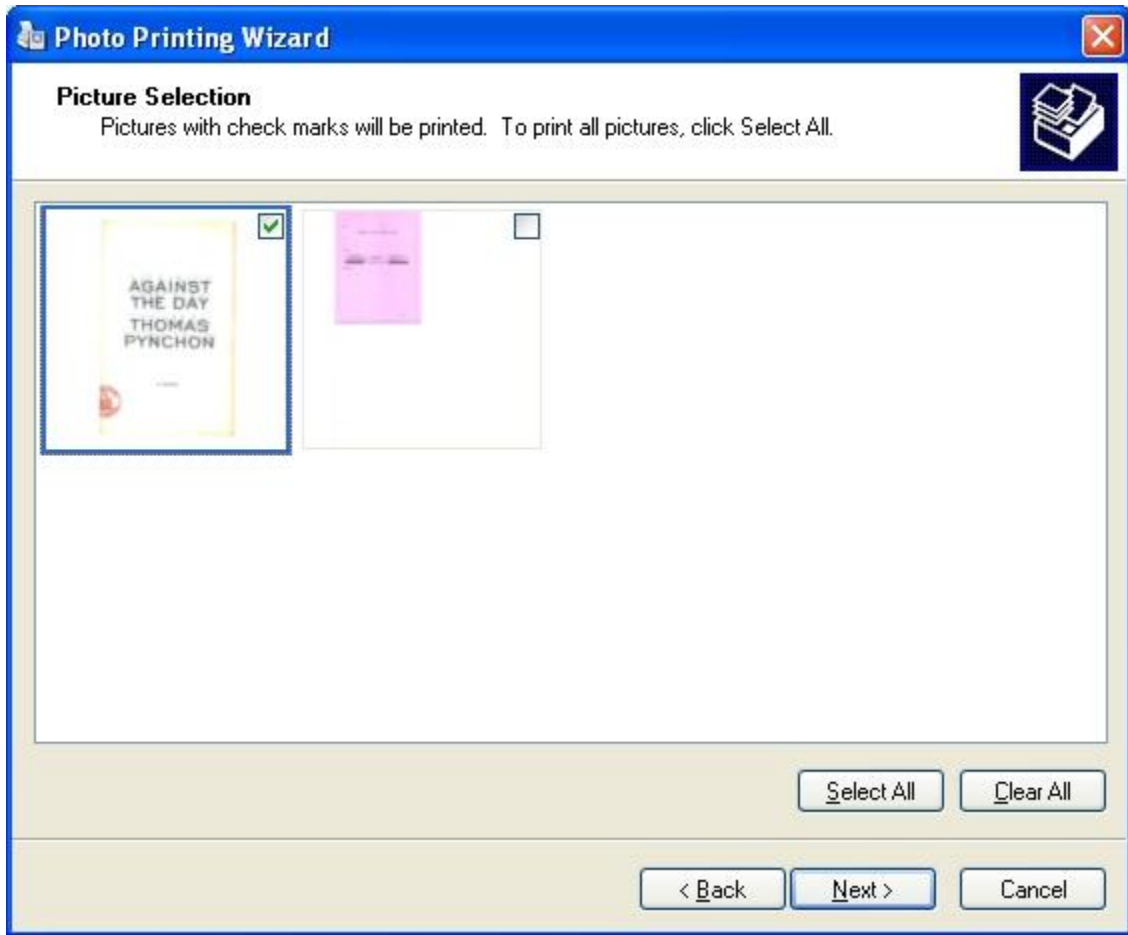

1. Double click on the file you wish to print. The picture will open in a new window. Click on the print icon at the bottom of the window.

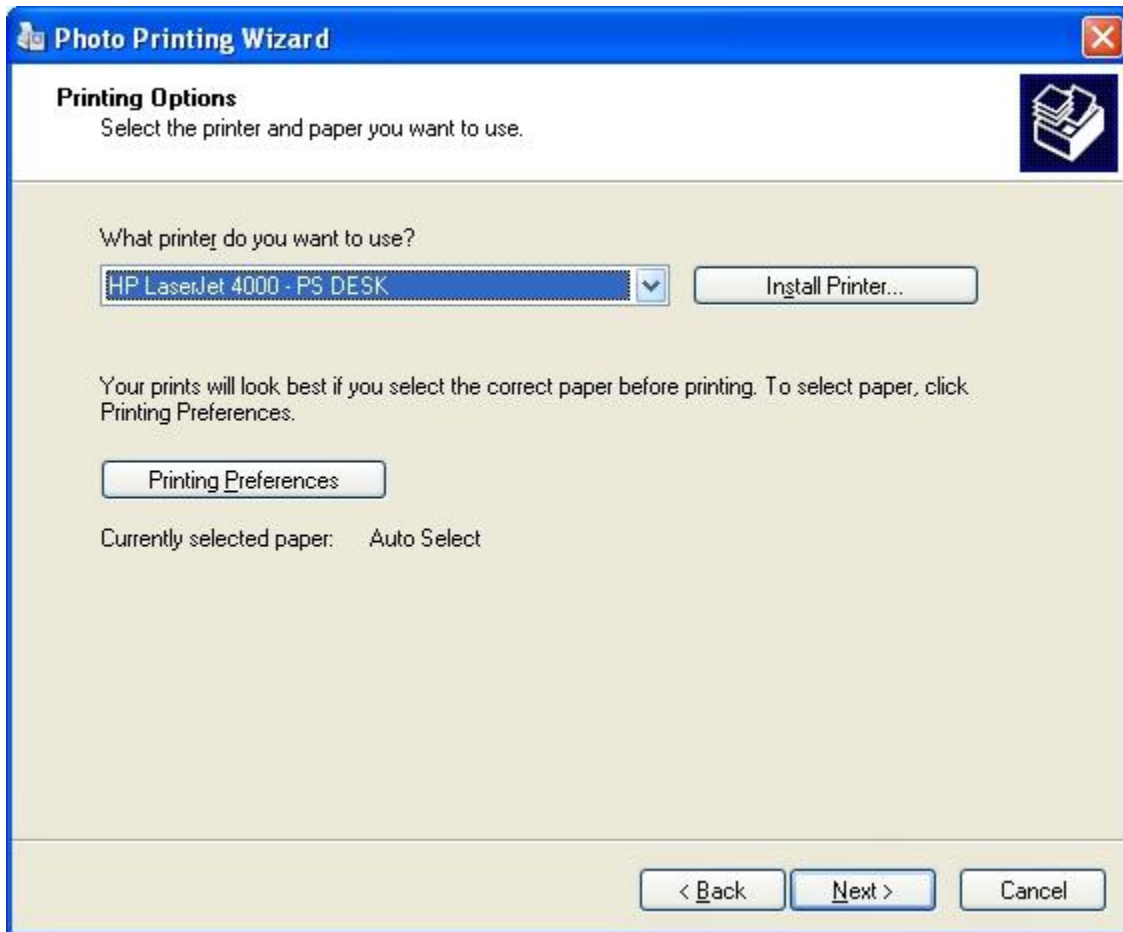

2. You will see the Photo Printing Wizard welcome screen. Click next.

3. Place a checkmark next to the images you want to print and then click next.

4. The printing options should be all set by default. Yours may look different from the ones shown below. Do not change any settings. Click next.

5. Select the layout for your print job. Choose the layout that looks best in the preview screen. Full Page Fax Print usually works well. When you are ready, click next.

6. Your images will print from the printer behind the white column near the lending services desk. Some image files take a few minutes to print based on their file size so please be patient. Click finish to exit the printer wizard.
